

**PALISADE™**  
SYNTHETIC UNDERLAYMENT

Palisade™ Synthetic Underlayment is made of 100% synthetic lightweight, high-strength polymer. Palisade comes in 1000 sq. ft. rolls, so it covers much more area per roll than 30 lb felt. It is 6X lighter and delivers 30X greater tear strength than 30 lb felt.

Palisade™ carries a 30 year warranty. The underlayment you choose for your roof is like a second layer of protection. 30 lb felt is basically heavy paper dipped in oil. After a few years the sun's UV rays will dry this oil up and it will no longer function as a water-barrier. *Does it make sense to install a metal roof system that will virtually last a lifetime with a felt underlayment that may last a fraction of that time?*

Palisade™ features Stonghold™ skid resistant technology, utilizing a highly engineered raised surface pattern of soft resilient rubberized polymer dots which act as grip points delivering skid resistant performance in wet/dusty conditions.

Industry leading Stonghold™ Skid-Resistant Technology

Palisade™ is part of a collection of accessories recommended for metal roofing from Best Buy Metals.
