

Retro-Ease Spacers

Revolutionary, light weight spacer made to take the place of wood or felt paper when installing a metal roof over existing shingles. The installer simply rolls the high density Polyethylene Retro-Ease out across the shingled roof and tacks it down. The metal roof is then attached. (Retro-Ease acts as a spacer between the old shingles and the new metal roof, providing air flow and ventilation.) Comes in 300' rolls.

Better Than Wood

- ✓ Eliminates need for tear-off
- ✓ Cost comparable to 1" x 4" wood
- ✓ Faster, easier, safer
- ✓ Won't crease the metal like wood
- ✓ Lightweight
- ✓ Won't rot or warp
- ✓ Low profile

Made in the U.S.A. using high quality materials.

1 box of Retro-Ease replaces thirty 10' long 1x4 furring strips.

Retro-Ease™ is part of a collection of accessories recommended for metal roofing from Best Buy Metals.
