

Our TurboShear HD tool is a shear attachment that attaches to any 14.4 volt or larger cordless or corded drill. It makes fast work of cutting metal roofing. The TurboShear HD even makes angled crosscuts through profiles of metal panels. Cuts up to 18 gauge steel panels.

Weighing just 4 lbs, the TurboShear HD is designed for one-handed use, allowing you to hold the panel in place with the other hand for control. It is made of quality components in Annandale, Minnesota.

Made in the U.S.A. using high quality materials.

- ✓ Cuts straight and to left.
- ✓ Capable of navigating tight curved patterns and square cuts.
- ✓ Blind cuts require a one inch starting hole.
- ✓ Can be re-positioned upside down for greater maneuverability.

This tool is part of a collection of tools recommended for metal roofing from Best Buy Metals.
