

Wonder™ Gloves

Wonder Gloves provide superior comfort and functionality at a great price. The unique textured latex coated palm and finger tips provide a secure nonslip grip that is hard to obtain by bare hands or by other cotton canvas, jersey, or leather gloves. Wonder Gloves help protect hands against minor cuts and abrasions yet work like second skin.

They provide unmatched fit and comfort while reducing hand fatigue. They are made of a unique cotton and polyester blend fabric that breathes while absorbing perspiration. This strong knit construction eliminates bulky seams - allowing greater dexterity that won't slow you down.

Made in the U.S.A. using durable materials.

This tool is part of a collection of tools recommended for metal roofing from Best Buy Metals.
