

Stainless Steel Snow Guards

4500 Series

Dependable Snow
Protection

The 4500 series snow guard is formed from 16 gauge stainless steel for superior strength.

4500 series snow guards are designed with an EPDM rubber seal on the bottom to eliminate the need for sealant on the underside.

Available in 37 colors to match nearly any metal roof, 4500 series snow guards have the strength needed to prevent snow from sliding on the roof.

4500 Series Snow Guards

Strong

Designed from 16 gauge stainless steel strength, with an embossed design which adds 40% more rigidity.

Protection

Prevents snow from sliding off of roofs, preventing damage to gutters, vehicles, and people below the roof.

Simple Installation

4500 Series snow guards feature an EPDM rubber seal on the bottom, eliminating the need for messy sealants.

Curb Appeal

Decorative shape and embossed design looks great on nearly any roof.

Powder Coated Colors

Available in 37 powder coated colors for long lasting color retention. Also available in bare finish stainless steel.

Curb Appeal

Decorative shape and embossed design looks great on nearly any roof.

No Minimums

As with all of our snow guards, you can purchase any quantity of 4500 Series Snow Guards.
